Travelling Blog.
Frontend development | February 2021

-A traveling Blog Page to different places, visiting events and eating good food in restaurants. want to create a TypeScript-based and HTML must be created dynamically.
-Link:https://abi30.github.io/FE21-CR5-ABDULLA/

Movie Factory.
Frontend development | March 2021

-In this project, my job was to create a list of movies for a "Movie factory" website without any framework. Information about the movies should be stored in a JSON file.
-Link:https://abi30.github.io/FE21-CR4-ABDULLA/

My Portfolio.
Frontend development | April 2021

-Yes, the very website you are currently looking at. It is written in HTML, SCSS and Bootstrap with a touch of JS and Jquery. I intentionally didn't use frontend framework.
